PROFESSIONAL SUMMARY

Software Engineer with **1+ year of experience** in **SWIFT banking payment systems, ISO 20022 messaging standards (SR2025), and automation testing**, with a strong background in **enterprise application development**. Proficient in **Java, Spring Boot, Angular, and PostgreSQL**. Experienced in designing **test automation frameworks** using Selenium, Playwright, and Cucumber (BDD) for functional, regression, and API testing. Delivered full-stack solutions including **HRMS** modules and an **Attendance Tracker & Timesheet** system with **n8n workflow automation**. Collaborative team player in **Agile (Scrum)** environments with a strong foundation in SDLC, STLC, and cross-functional delivery.

TECHNICAL SKILLS

Programming Languages	Java, Python, JavaScript
Frontend Technologies	Angular, HTML5, CSS3
Backend Technologies	Spring Boot, Hibernate, Servlets, JDBC, FastAPI
Databases	MySQL, PostgreSQL, JDBC
Banking & Payments	SWIFT MT/MX, ISO 20022, PACS.008, PACS.009, PACS.009 COV, CAMT.053, CAMT.054, SR2025
Automation & Testing	Selenium WebDriver, Playwright, REST Assured, TestNG, Cucumber (BDD), Apache POI
Testing Expertise	Functional, Regression, Smoke, API
Workflow Automation	n8n Workflow Development, JSON Workflow Automation
Tools & Platforms	Git, GitHub, GitLab, Jira, Postman, IntelliJ IDEA, Eclipse, VS Code
Methodologies	Agile (Scrum), SDLC, STLC

EXPERIENCE

Software Engineer <i>Ticking Minds Technology Solutions Pvt. Ltd</i>	May 2024 – Present <i>Chennai, India</i>
- Developed enterprise-grade applications using Java, Spring Boot, Angular, MySQL, and REST APIs across HRMS application development. - Worked on ISO NOVA and SWIFT MX message validation platforms supporting banking standards, processing PACS.008, PACS.009, PACS.009 COV, CAMT.053, and CAMT.054 message formats. - Designed and developed an Attendance Tracker and Timesheet Management System using Angular and n8n JSON-based workflows, automating attendance processing, timesheet tracking, and workforce reporting. - Built n8n workflow automation solutions, reducing manual effort and improving operational efficiency for business processes. - Designed and maintained automation frameworks using Selenium WebDriver, Playwright, Cucumber (BDD), TestNG, and REST Assured for comprehensive web and API test coverage. - Performed functional, regression, smoke, and API testing to ensure software quality, reliability, and compliance with business requirements. - Collaborated with cross-functional teams in Agile (Scrum) environments to deliver scalable, secure, and high-performance software solutions.	

PROJECTS

ISO NOVA – Banking Payment System (SR2025) <i>Python, FastAPI, Angular, ISO 20022</i>
- Developed a multi-layer ISO 20022 and SWIFT MX message validation platform covering schema, structural, data, business rules, and end-to-end workflow validation. - Implemented validation for PACS.008, PACS.009, and PACS.009 COV payment messages compliant with SR2025 standards. - Developed a bulk message generation feature integrated with the test suite, enabling large-scale automated validation runs.

- Designed a feature to create payment messages via manual input and **auto-convert into structured XML format**, reducing message preparation time.
- Built **regression test suites** improving validation accuracy and execution efficiency for payment message processing.

Attendance Tracker & Timesheet Management System | *Angular, n8n, JSON Workflow Automation*

- Designed and developed a full-featured **Attendance Tracker and Timesheet Management System** to automate **workforce management** activities across the organization.
- Built **Angular**-based frontend with **dynamic dashboards** for real-time attendance monitoring, timesheet submission, and approval workflows.
- Implemented **n8n JSON-based workflow automation** to handle attendance processing, timesheet validation, notifications, and reporting with **minimal manual intervention**.
- Integrated **automated reporting** features to generate daily, weekly, and monthly attendance summaries for management review.

BNY – Banking Payment System (SR2025) | *Selenium, Playwright, Cucumber, TestNG*

- Validated **high-value payment transactions** across **SWIFT, CHAPS, TARGET2 (T2), and CHIPS** payment networks.
- Automated **MT and ISO 20022 (MX)** message validation including **PACS.008, PACS.009, PACS.009 COV, CAMT.053, and CAMT.054** using a hybrid **BDD Cucumber** and data-driven framework.
- Developed comprehensive **regression test suites** improving test coverage and execution efficiency across payment workflows.

Vistaflow – HRMS Application | *Java, Spring Boot, MySQL, Postman*

- Contributed to development of an enterprise **HRMS** application; designed and implemented the **Leave Management Module** with request workflows and approval logic.
- Built **RESTful APIs** and integrated backend services with **MySQL**; optimized **SQL queries** for data consistency and integrity.
- Performed comprehensive **API testing using Postman** – created and executed test collections for all HRMS REST endpoints, validated **request/response payloads, status codes**, and error handling scenarios.
- Documented **API endpoints** in Postman with sample requests, expected responses, and edge case scenarios to support team collaboration and onboarding.

EDUCATION

STET Women’s College <i>Master of Computer Applications (MCA) – CGPA: 8.94 / 10</i>	Tamil Nadu, India <i>July 2022 – April 2024</i>
STET Women’s College <i>Post Graduate Diploma in Big Data Analytics (PGDBDA) – CGPA: 9.00 / 10</i>	Tamil Nadu, India <i>July 2022 – April 2023</i>
STET Women’s College <i>Bachelor of Science (B.Sc.) – CGPA: 8.84 / 10</i>	Tamil Nadu, India <i>June 2019 – April 2022</i>
